Project Name	ComicCraft – AI-Powered Comic Story Generator
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

ComicCraft aims to simplify comic creation by combining Generative AI text generation, image synthesis, layout management, preview and PDF export in a single web application.

Project Overview

Field	Value
Scope	Text generation, AI image creation, comic layout, preview and PDF generation.
Problem Statement	Comic creation requires writing, character design, illustration, panel arrangement and final formatting; AI tools may be separate.
Impact	Makes the creative process simpler and more accessible for students, storytellers and creative users.
Approach	FastAPI coordinates Gemini-based story generation, Stable Diffusion image generation, layout assembly, preview and PDF export.
Key Features	Prompt-based generation; character/setting/scene/art-style customization; five-panel output; AI illustrations; preview; PDF export.

Resource Requirements

Resource Type	Category	Requirement / Solution
Hardware	Computing Resources	Standard personal computer or laptop capable of running the development environment
Hardware	Memory	Not specified
Hardware	Storage	Not specified
Software	Frameworks	FastAPI
Software	Libraries / Models	Google Gemini; Stable Diffusion; HTML/CSS/Jinja2; PDF generation tool/library
Development Environment	IDE / Environment	Python environment; exact IDE not specified
Data	Input	User story prompt and customization details
